OBSERVATIONS, HABITAT, TIME, ETC. 6 ADDERS SEEN SUNNING THEMSELVES ALONG SHORT SECTION OF NORTHERN BOUNDARY NEAR WEDHOLME HOUSE FARM.		
OBSERVERS		Continue on back if necessary. PTO 03 DEC 2007
ENTER 'C' IN THIS BOX IF YOU WISH RECORD TO REMAIN CONFIDENTIAL. ☐		Carlisle Natural History Society — Field Record Card. Please return to: Recorder, C.N.H.S., c/o The Museum, Tullie House, Castle Street, Carlisle CA3 8TP. Tel. 34781

myself and were in the same place before down the next day (21-10-90) hoping to see the bird flying in to roost. After about an hour of daylight we still hadn't seen the bird, and decided to cross the river and see if the bird was indeed there. We didn't see the bird in the tree until it flew out, enabling us to positively identify it.

(1000+) Grey lags.

I finally approached them to within $\approx$ 150 yds, & had excellent views through 15-60x60 telescope. Sides of shape more graceful & rounded than G.W. neck tapering & narrower at top. Head smaller. Bill longish, pointed, $\geq \frac{1}{2}$ dark, on bridge, & pale stripe along bill. Legs orange. Overall plumage rather ~~the~~ uniform! Head & upper neck dark brownish, $\rightarrow$ paler on breast & underparts - rather uniform buffish. Whole of mantle rather dark brown-grey, with marked pale edging (very unlike W). One had a small narrow patch of white surrounding top & sides of bill. undertail white (also few

good light. Neck darker than body in most lights. Head smaller and very dark. Bill not obvious, as was all-pale bill of L.H. at that age. Neck slender and longer. Overall body colour brownish, cf. grey of L.H. leg colour very difficult to see.

In flight, wings clearly & uniform slate-grey above, very distinct from L.H.'s wing with pale-grey patches. Wings looked long and pointed.

They informed Wight police
who said there had been
several reports of a porcupine
seen in that area. They looked
it up in a wildlife book at
bookends and are positive it
is an African species of
porcupine. From further
inquiry they have found
out that a porcupine has
escaped from captivity in
that area, and that the
owner is trying to recapture
it.

SPECIES HARES, FOUR OF THEM.		GRID REF.
LOCALITY IN A FIELD TO THE SOUTH EAST OF EDEN BRIDGE, LAZARBY.		DATE 10/1/98

small amount of grey on the belly.
The tail did not seem to be noticeably
forked, but it was not square, some
feathers being longer than others.
The legs were quite long and black.
From this it probably safe to assume
the bird was a Leach's fork-tailed
petrel, undoubtedly shown in by the
vestibular gales.
(only over water) on quite long
wings (much longer than house
martin) when it showed a
slate white rump and a —
TO THE ISLAND.

SPECIES	LEACH'S PETREL	GRID REF.	
LOCALITY	Albury	DATE	7. 10. 58

Leach's fork-tailed petrel.		
DATE	TIME	GRID REF.
April 1977	11.30 am	
LOCALITY estuary, Burgh marsh pt. estuary at ebb tide.		
OBSERVATIONS An obvious petrel battling against westerly winds was noted 20 m in the edge of the marsh. It was a bit larger than a house martin its flight was much more erratic sinking and bobbing in the wind. It took a bounding zig-zag course, and times I thought it was going to pitch into the water when it reached the bottom of its trajectory. It also glided periodically on its back if necessary.

the fruiting clusters from above and hanging on their stems by their hind legs would sever cluster of fruit with teeth and without changing position deal with large seeds or fruit within their grasp at break. Sudden speed, allowing the green seed-cases to drop in the process. So most fruit was consumed in this upside-down position rather than the 'telling up' position adopted with hazel-nuts. (I attempted two photographs although they were considerable distance off, being on other side of river.) In spite of a strong breeze these animals were undisturbed in the feast.

THIS PRONGER OF THE BOTENBERG NIGHT WAS
 FOUND BY JAY BROWN (LAST GUINNESS LIGHTS
 OF THE BATHING DAWN) IDENTIFY THAT
 FEEL SOMEWHAT REPRODUCED FOR ONE AFTER
 NIGHT THAT! AFTER ALL THIS WAS SOMETHING
 OF A RARITY IN CARWILL.
 I FEEL CERTAIN INSTANT OBSERVATION
 WOULD BE MORE TO THE POINT
 LIVING.

THE POOL DEANE EIDER MUST
 HAVE FLOWN OUT OF THE NIGHT
 VERY EXHAUSTED!

SPECIES <i>Buzzard</i>		GRID REF.
LOCALITY <i>A75 near Annan</i> X		DATE <i>26-12-99</i>
OBSERVATIONS, HABITAT, TIME, ETC. <i>This buzzard was killed by a Nestles milk tanker on the A75 near Annan. And was given to me by who works there.</i>
